

# CROSSWALK MARKER

INCREASE THE VISIABILITY OF PEDESTRIAN CROSSWALKS

The popular L104 Air Marker used with the QWICK KURB® Longitudinal Channelizer System is now available for mounting on pedestrian crosswalks with the L54 base. Compared to conventional crosswalk delineators, the Air Marker offers higher target value both day and night. Each side has 232 square inches of Hi-Intensity retro-reflective sheeting.

Anchoring sets for concrete and asphalt are available.
